

The minimum wage should increase as inflation increases. 10 years ago, I earned 10.01 today at 11.05, this is the minimum for my Sector, during that time, my landlord increased by almost 100%.FOR 3 MONTHS, I'M NOT LIVED BECAUSE THE CURRENT PROFITS DO NOT LET ME PAY FOR EVEN RENTS FOR THE HOUSE, these are the realities and the government does nothing about it. The employer cheats as much as he can, the courts are on the side of employers despite the fact that the employee works like a slave, Ireland ends up being foreigners. You can no longer live normally in this country, there is no law in this country even the convention of human rights is not respected. here you must be an attorney who does not know the law but knows how to pull money out of your pocket. the law is written under businessmen not under normal people

How much money do you receive for such consultations, I suggest you spend 1 month for the minimum wage

Regards [REDACTED]
