

To Whom it may concern

Perhaps when minimum wage increases are introduced and put into the media it should be stated that 9.25 is not the minimum wage for all as this only applies to experienced adult worker who may have 25yrs experience age under 18 = 6.41 over 18= 7.40 over 19 with 2yrs experience = 8.33 and only after this 9.25.

I SUGGEST OVER 19 SHOULD BE 9.25 AND AFTER THAT 11.00 euro WHICH ONLY EQUATES TO MINIMUM LIVING STANDARDS.

Working and employing staff in hospitality anything under 8.50 is exploiting staff also anything below 11.00 for a trained and experienced employee is degrading. A 10CENT INCREASE LAST TIME ROUND WAS INSULTING. Perhaps a high pay commission should be formed to look at politicians pay increases and expenses would be more beneficial also some civil servants who have extended holidays i.e (teachers ) and others especially in the HSE with pensions , a job for life regardless of whether they can do the job or not.

This commission will probably cost the state a fortune and come back with another insulting amount.

Another waste of money unless the above is increased at least by 1.00 per hour.
